

## **Vertex Standard Exhibits at ASIS International Security Expo to Introduce Private Security Professionals to eVerge™ for Better Value Communications.**

September 27, 2013 – Vertex Standard completed a successful week exhibiting at the ASIS International Security Expo held September 24 – 26, 2013 in Chicago, Illinois, USA. Over 20,000 security professional end users, integrators, dealers and distributors attend this annual exhibit for the best security products and solutions for their organizations. Vertex Standard introduced hundreds of visitors to the new eVerge digital two-way radio series that provides a new choice in affordable digital land mobile radios.

eVerge digital radios are an ideal solution for security professionals to evolve to better communication and do digital right the first time, getting the right radio with the right protocol and right performance – all at a better cost to connect without compromise. Vertex Standard demonstrated the capabilities of the new EVX-530 Series digital portable radios, EVX-5300/5400 digital mobile radios and EVX-R70 digital mobile repeater designed to help customers communicate better with improved call quality, better coverage and better privacy than traditional analog two-way radios. Evolving to digital communications enables security professionals to have greater privacy and control of who receives their messages through flexible [call management](#) and text messaging capabilities. Unlike analog communications, eVerge digital enables messages to be directed to a single person or group without others hearing on the same channel or frequency.
